EDUCATION

College

November 2025

B.S Information Technology with Specialization in Web and Mobile Application

Far Eastern University Institute of Technology (FEUTECH)

Bronze Medalist (2022)

EXPERIENCE

Internship - World Vision Development Foundation Inc,

Feb 2025 - July 2025

Web and Mobile Developer Intern.

- Took part in the development of Student Ambassador Portal (SAP) by designing, coding, and implementing the landing page, login with authentication, user profiles, user progress and dashboard with API Integration for different modules using NextJS.
- Led the redevelopment of the World Vision PH app using Flutter for both Android and IOS devices.
- Assisted employees with network, hardware, and software issues including network connectivity, display and sound projection, boot problems, printer connection, and ZScaler account issues.
- Took part in Installing UniFi Access Point devices across multiple floors.
- Assisted different employees in setting up new devices such as installing the necessary apps for each department.

PROJECTS

TrashTrack - Iot Based Enhanced Waste Management System with Gas Detection for Web and Mobile Application using Arduino.

Thesis Project - clarencebabiano.trashtrack.com

- Detects different harmful gasses using MQ4 and MQ135 Sensors.
- Developed a Web system using php, mysql, Javascript, and CodeIgniter.
- Developed a Mobile system using Flutter, and connected it to the web using API.

ETUSOK - An Ecommerce Street Food Site.

School Project

- ETusok is an ecommerce project showcasing a working eCommerce platform with features such as add to cart, order tracking, and checkout functionality. The app highlights various types of street food available for online ordering in the Philippines.

World Vision PH - A Mobile App Redesign for iOS and Android Devices.

Internship Project

- The World Vision App was redesigned to provide a modern look with unique design elements tailored specifically for World Vision Philippines, enhancing the overall user experience.
